A rew months ago we drew attention to the delay in the commencement of the work of making the new harbour at Manila, although a large sum of money had been raised for that purpose by the imposition of special dues upon shipping. That our remarks were well justified may be gathered from the fact that one of the first acts of the | send them to Singapore, and were only left at newly formed Chamber of Commerce in the | the house of this woman in the meantime. They capital of the Philippines has been to present to the Governor-General a memorial on i the same subject, in which they regret that during the time which has elapsed since the from a native paper published at Kioto:- "We project was first entered on "something has hear that the more and something has not at least been done to improve the inner Government, pledging as security the gold cognition of your good services and exertions in conceptances. project was first entered on " something has harbour." As to the main work, the construction of the new harbour, the Chamber opinion, but it may be inferred from the use | practiced by the Korean officials in order to of the words "at least" in the above quoted extert money from the people. The Harbour Commission at all events seems to have hastened to justify or excuse itself. It is not the custom in Manila to report the proceedings of public bodies, but in the Comercio of the 13th instant we find quite an extended account of a meeting of the Harbour Commission, to which are appended a fow remarks intended to show that the deted the 5th October last. forgotten, however, that the prospect has been as fair before, but, after the plane had been approved and everything seemed in fair order for a commencement being made, it was decided to reconsider the whole matter de nove, and the consideration has lasted up to the present time. The Harbour Com. mission has been in existence the whole time, and has, apparently, had power to execute minor works for the improvement of the existing accommodation, but the Chamber of Commerce seem to think it has not done so much in this direction as it ought to have done. Now, however, it would appear that all preliminary difficulties have been ovorcome and that the Commisgion is at liberty to enter on the serious work of constructing the new harbour and the important but smaller one of improving the inner harbour. The plan now approved, we believe, considerably modifies anonymous letter over the signature of this project, but it is still intended to provide accommodation for the shipping close to the city, thus facilitating the work of loading and discharging and giving increased safety. The advantage which will be accured to the port and to the shipping frequenting it by the execution of this work will be incalculable, and it is to be hoped that no further obstacle will be interposed to prevent its speedy completion.

PRESENTATION TO CAPTAIN GOGGIN.

Fredk. Dodwell

C. S. Goodwyn

A presentation was recently made to Capt Goggin, of the river steamer Kiung Chow, by the residents of the Foreign Concession at Canton in recognition of the prompt measures he took for procuring assistance from Hongkong at the time of the late attack by a Chinese mob on Shameen. It was felt by the residents that Capt. Goggin merited some token of their appreciation of his conduct, and a subscription was started, by which sufficient was raised to purchase a very handsome silver tea service. This was presented at Canton a few days since, accompanied by a testimonal as follows:--

THE WAR IN TONQUIN.

PROM OUR OWN CORRESPONDENT. HAIPHONG, 13th December.

I mentioned in my last that all the steamers were up at Hanoi. The Touquin arrived here this morning from the capital bringing jutelligence that the expedition for Sontay has at length been put in motion. The force, which left Hanoi yesterday, consisted of about 6,000 men, besides the gunboats. There was quite a fletilla going up the river, not less than seventeen steamers and launches with jun's in tow. The troops, artillery, &c., were landed about six or seven miles below Soutay, without a shot being fired, and they were, according to latest ficance" comes in, and the fact remains as stated assault upon the town was expected to be made on it and which can be medified only in his that a census of the population has been made to day, and by Sanday we shall know of the quarters. success or otherwise of the French forces. HAKODATE.

27th November.

For several days past rumours have been current here regarding the loss of a Russian vesse. on the coast of Japan about 140 miles from Hakodate, a telegram having been received stating that the crew, consisting of 22 men, Russians and Chinese, were sayed. Yesterday the shipwrecked men arrived here in one of the small coasting steamers, and we now find that they consist of Lt. A droggist in Paris, having been convicted of adulterating sulphate of quinine, has been sontenced to a year's imprisonment at hard labour. In addition, he is to pay a fine of a thousand rancs, his name and crime are to be published in twelve political and twelve professional papers, and should he ever reopen his store, to the door thereof is to be affixed a sign: "Sentenced for adulterating sulphate of quinine." This is than would be regarded as just in this country. But the crime was an infamous one. It was stealing from the sick main his only hope of recovery. And the indident is one which drug- China Sugar Rofining Company, Limited-3134 gists, lawmakers, and the public here would well to take to heart. Complaints are not infrequently heard in New York of various drugs being poor in quality. Physicians are forced to direct that their prescriptions be filled at certain stores, that they may be sure of the strength of the ingredients. Some druggists seem to be running a race to see who can sell quinine pills at the lowest price per dozen, and they advortise each competing reduction with great flourish of trumpets. But while the price goes down, does the quality remain at proof? Or would universal and rigid examination of drugs of all kinds show that many dealers deserve to share the Frenchman's fate?

The Lancet contains an exhaustive article on the "Therapentical Drinking of Hot Water; Its Orgin and Its Use." The article is written by Dr. Ephraia. Cutter, an eminent physician of No - York City, and contains some statements and suggestions which, to say the least, are cortainly worthy of attention. Dr. Cutter says that the first use made of hot water as a medicine, or "health regulator," was made by Dr. James H. Saliabury of New York, who by a series of experiments on men and various animals, demonstrated its efficacy. In his article Dr. Cutter gives directions for proper are of hot water. In the first place, it must be hot, i.e., not less than 110 o nor more than 150 o Fahrens heit. This excites proper action of the disgestive Sat. 19 organs. Cold water depresses and lukewarm water causes vomiting. For diarrhos the hotter the water the better. For hemorrhages it should be at blood heat. The quantity of hot water drunk varies from one half pint to a pint and one-half, according to the condition of the patient and the disease treated. The hot water should be taken one or two hours before each me !, and half an hour before retiring. This gives the water time to operate before food enters the stomach or sleep comes. The water should be sipped slowly, and the swallowing of half a pint should take half an hour. It takes six months to wash out the liver and intestines thoroughly. If the hot water seems "flat," flavourings, such as lemon sage, or ginger, may be added. The offects drinking are noticed in the improved feelings of the patient. The arine becomes clear as crystal, and perspiration is free. The digestion improves, thirst disappears, and there is no

longer a graving for liquor. Taken as a whole,

We have most of us arrived by this time at a knowledge of the elementary principle incul-. cated about a century age by Adam Smith, that the value of our worldly possessions is not to be estimated by the amount of money we carry about with us, or can command at short notice. Still it is interesting, nevertheless, to know what sort of amount of current coins is available by us and our neighbours for the common requirements of daily life. An industrious author has lately published in Paris a book which goes minutely into an enquiry upon this subject; and he has enabled himself, after much toil, to give the result not only as regards his own country, but 13 others. He estimates the total amount of coined money now in circulation at 38,000 millions of france, or about exactly 1,500 millions sterling, of which nearly one half is in gold, rather more than two-fifths in silver, and the rest in other sorts of metal. Of all the uations mentioned, France is the one which has by far the most of this coin in circulation. This is true not only as regards the one metal. but both; for Prance heads the list in the matter of gold with 117 france per inhabitant,
